SUPERSOFT

CASH BOOK

Where does all the money go? Are you making ends meet? With **CASHBOOK** questions like these can be answered at the touch of a button!

The electronic equivalent of an accounts book, **CASHBOOK** employs the power of your computer to store details of transactions, add them up and sort them according to date, type, amount etc. You can even get the computer to search for particular transactions — in a fraction of a second!

CASHBOOK is ideal for home use, for clubs and societies, or for smaller businesses which don't need a sophisticated accounting system (it can even handle VAT).

Supersoft, who are based in North West London, have been writing programs for microcomputers since 1978.
